 (over brick)

Plan:

Looking for street appeal, well here it is! Our show home design looks stunning from the road with its double gables and just the right mixture of brick and cedar to catch the discerning eye.

And just wait until you get inside, here you'll find a separate lounge through the double sliding barn style cedar doors, tucked nicely away behind the kitchen is your walk-in pantry, and over in the dining area you can rest on your comfy window seat, or if you want some privacy you can choose the window seat in the master bedroom! Couple all these nice touches up with your separate laundry and separate toilet and you'll be living the dream.
