Plan:

Now here is a design to suit your Family, with 4 bedrooms, 2 bathrooms, separate toilet, separate laundry and separate lounge your family will just love living here.

And that's not all, the walk-in pantry, window seats and built-in bookshelf just make this an even easier family home to live in. The raked ceiling to the kitchen, dining & living also extend through to your portico. The barn style doors that lead you into your separate lounge only serve to make this any even more desirable family home to live in.
